

# Level 2 Certificate in Understanding the Care and Management of Diabetes

Diabetes affects millions of people across the UK and is one of the most common long-term health conditions encountered in health and social care settings. This qualification provides learners with a comprehensive understanding of diabetes, including the different types of the condition, how diabetes is diagnosed, monitored and treated, and the support individuals may need to manage their health and wellbeing.

## ***Why learn with Coleman Training?***

**Our learners are our priority.** With over 25 years of experience in the social care sector, we understand the needs of our workers and we are committed to doing everything we can to support them.

We believe that achieving a qualification is about far more than completing assessments and gathering evidence. It's about developing confidence, building competence, and feeling supported every step of the way.

## What does the Level 2 Certificate in Understanding the Care and Management of Diabetes cover?

This qualification consists of four units.

- Understand the prevention and early intervention of Type 2 diabetes
- Understand the primary care and detection of diabetes
- Understand the treatment and management of diabetes
- Understanding Diabetes

This is a knowledge-only qualification, which means that you will complete workbooks and may participate in professional discussions with your assessor. You will not be observed in the workplace for this qualification.

## Who is the Level 2 Certificate in Understanding the Care and Management of Diabetes for?

This qualification is suitable for anyone working in, or aspiring to work in, health and social care roles where they may support individuals living with diabetes.

Aligned to the Care Workforce Pathway, it is particularly relevant for those working within the Care or Support Worker role category, including care assistants, support workers, senior care workers, personal assistants and healthcare support workers. It is also valuable for staff working in residential care, nursing homes, domiciliary care, supported living services and community-based healthcare settings.

The qualification is ideal for learners who wish to develop a deeper understanding of diabetes, enabling them to provide safe, person-centred support and promote positive health outcomes. It is equally beneficial for those seeking to enhance their knowledge as part of their continuing professional development or progression within the health and social care sector.
