

Level 5 Award in Understanding Digital Leadership in Adult Social Care

The Highfield Level 5 Award in Understanding Digital Leadership in Adult Social Care has been designed for managers and leaders who want to confidently lead their organisation through the digital transformation of care services.

As adult social care continues its journey towards greater digitisation, effective digital leadership is becoming a core management skill. This qualification will help leaders understand not only the technology itself, but how to use it to improve care quality, strengthen organisational performance and create better outcomes for the people they support.

Why learn with Coleman Training?

Our learners are our priority. With over 25 years of experience in the social care sector, we understand the needs of our workers and we are committed to doing everything we can to support them.

We believe that achieving a qualification is about far more than completing assessments and gathering evidence. It's about developing confidence, building competence, and feeling supported every step of the way.

CQC has made it clear that digital systems play an important role in supporting high-quality care

Across England, the Government, NHS England and the Care Quality Commission (CQC) are driving a major programme of digital reform within adult social care. Digital social care records are recognised as best practice, helping providers improve governance, enhance information sharing, reduce administrative burden and respond more effectively to people's changing needs. Services that continue to rely heavily on paper-based systems may find it increasingly difficult to demonstrate that they are delivering safe, effective and well-led care. Digital care records, electronic medication systems, data sharing, cyber security and the use of technology to improve outcomes are no longer viewed as optional extras – they are increasingly recognised as essential components of safe, effective and well-led care.

What does the Level 5 Award in Understanding Digital Leadership in Adult Social Care cover?

This qualification explores the knowledge and skills required to lead digital change successfully.

Learners will develop an understanding of digital strategy, data management, information governance, cyber security, digital culture and the leadership approaches needed to engage and support teams through change.

There are 3 units:

- The use of technology and data in adult social care
- Implementing technology in adult social care
- Leading change, learning and improvement in adult social care

Who is the Level 5 Award in Understanding Digital Leadership in Adult Social Care for?

The course is particularly valuable for:

- Nominated individuals
- Registered Managers
- Care Managers which are not registered
- Deputy Managers
- Assistant Managers
- Operational Managers
- Local authority commissioners
- Digital roles with Integrated Care Systems (ICSs)
- Housing and voluntary services
- Senior leaders who are responsible for ensuring their service remains compliant, efficient and fit for the future.
